

## MyEtherWallet Tutorial for the FYP Token participation during the Flyp.me Crowdsale (aka ICO)

**Disclaimer:** We publish the following instructions only as guidance on one of the ERC20 wallet option for the Token Sale Period. Participants are advised to conduct their own research and not rely solely on material we are presenting. We make no representations or warranties that the following material is complete or accurate, or that MyEtherWallet (or any associated software or services) will be reliable or function as described. As such, contributors assume all risks associated with the use of MyEtherWallet (or any other ERC20 wallet) in connection with the Token Sale Period. For the terms and conditions concerning the FYP Token Sale Period please visit:

<https://flyp.me/saleterms.pdf>

**Please note that participants can use any Ethereum wallet of which they control the private keys. A list of recommended wallets can be found at <https://flyp.me/faq>**

### Getting Started

In this tutorial, you'll learn how to manually send a transaction during the Crowdsale using MyEtherWallet, which is one of the most popular Ethereum Wallets.

### Step One: Generating wallet

Open your **web browser** and navigate to <https://myetherwallet.com>. Create a secure password on this screen. Click **Generate Wallet** to create your wallet:

Always check the URL and look for MYETHERWALLET LLC [US] Certificate up there. Look for <https://www.myetherwallet.com/>. Be safe & secure.

 MyEtherWallet

3.10.3.9 English Gas Price: 21 Gwei Network: ETH (MyEtherWallet)

New Wallet Send Ether & Tokens Swap Send Offline Contracts ENS Check TX Status View Wallet Info Help

### Create New Wallet

Enter a password

Do NOT forget to save this!

Create New Wallet

This password *encrypts* your private key. This does not act as a seed to generate your keys. You will need this password + your private key to unlock your wallet.

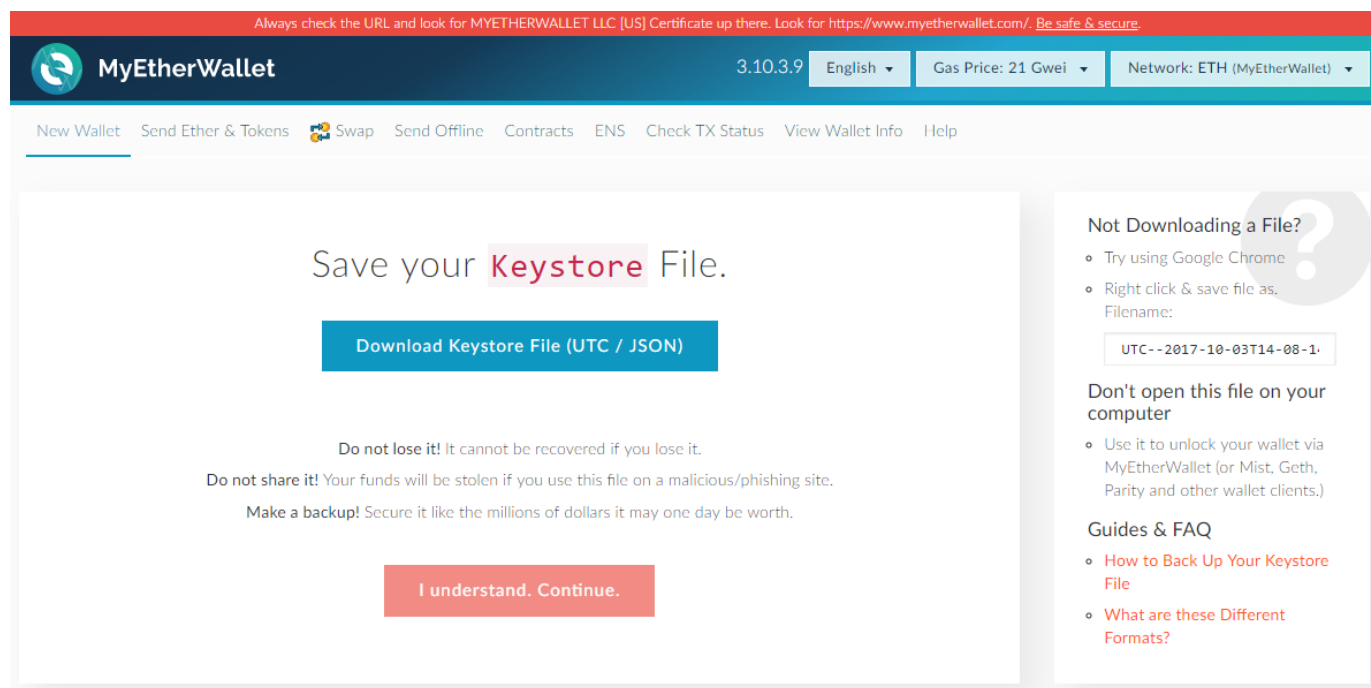

[How to Create a Wallet](#) · [Getting Started](#)

Already have a wallet somewhere?

- Ledger / TREZOR / Digital Bitbox: Use your **hardware wallet**. Your device *is* your wallet.
- MetaMask Connect via your **MetaMask Extension**. So easy! Keys stay in MetaMask, not on a phishing site! Try it today.
- Jaxx / imToken Use your **Mnemonic Phrase** to access your account.
- Mist / Geth / Parity: Use your **Keystore File (UTC / JSON)** to access your account.

## Step Two: Saving your wallet file

Click **Download** and save the file on your hard drive. Then click **Continue** to agree not to lose the file. Locate the folder you saved your wallet file in. Duplicate the wallet **file** and store the duplicate in a secure separate location. You must have access to this **file** and your **password** to access your account. **If you lose these, there will be no way to access your account again.**

## Step Three: Obtaining Ether and Funding the Account

Utilize one of the reputable cryptocurrency exchanges to purchase Ether (such as: <https://www.holytransaction.com>, <https://www.kraken.com/> or <https://poloniex.com/> ). If you store your Ether on an exchange you can send it to the **address** just created. You will need to factor in a small amount of Gas (a transaction fee for miners) to compensate for the fees associated. Once you've obtained your Ether, send the **amount** you want to the **address** just created.

You will need to unlock your address again, to send Ether to your wallet. Click on the **View Wallet Info** tab. Open the **file** you just saved and backed up by entering your **password**.

Always check the URL and look for MYETHERWALLET LLC [US] Certificate up there. Look for https://www.myetherwallet.com/. Be safe & secure.

## View Wallet Info

This allows you to download different versions of private keys and re-print your paper wallet. You may want to do this in order to [import your account into Geth/Mist](#). If you want to check your balance, we recommend using a blockchain explorer like [etherscan.io](#).

### How would you like to access your wallet?

- ☐ Metamask / Mist
- ☐ Ledger Wallet
- ☐ TREZOR
- ☐ Digital Bitbox
- ☒ Keystore File (UTC / JSON)
- ☐ Mnemonic Phrase
- ☐ Private Key
- ☐ View with Address Only

Parity Phrase: [No longer supported](#)

### Select Your Wallet File

SELECT WALLET FILE...

Your wallet is encrypted. Please enter the password.

.....

### Unlock your Wallet

Unlock

Once unlocked, you can send from an exchange or other wallet using the address from **Your Address** or the address from **Your Address QR Code**:

? Your Address

0xc33F11bB6fC72385d982c7E845D78eDB4d852C91

? Keystore File (UTC / JSON • Recommended • Encrypted)

Download

? Private Key (unencrypted)

.....

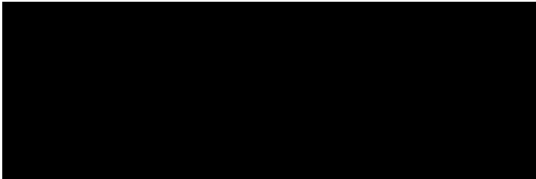

? Print Paper Wallet

Print Paper Wallet

Your Address

Private Key (unencrypted)

Your wallet is now *funded*.

## Step Four: Verifying The FYP Token Sale Address

Navigate to <https://flyp.me> and copy the **Smart Contract Address**.

## Step Five: Sending ETH

Navigate back to the web browser tab with MyEtherWallet. Click on the **Send Ether and Tokens** tab. Click **Select Wallet File...** . Browse to where you stored the files in the previous steps. Open your **wallet file**. Enter your **Password** and click **Unlock**.

The screenshot shows the MyEtherWallet website interface for sending ether and tokens. At the top, there is a red banner with a security warning: "Always check the URL and look for MYETHERWALLET LLC [US] Certificate up there. Look for https://www.myetherwallet.com/. Be safe & secure." Below this is a dark blue header with the MyEtherWallet logo, version 3.10.3.9, and dropdown menus for language (English), gas price (21 Gwei), and network (ETH (MyEtherWallet)). A navigation bar includes links for New Wallet, Send Ether & Tokens (which is active), Swap, Send Offline, Contracts, ENS, Check TX Status, View Wallet Info, and Help. The main heading is "Send Ether & Tokens". The interface is divided into three columns. The first column, "How would you like to access your wallet?", lists several options: Metamask / Mist, Ledger Wallet, TREZOR, Digital Bitbox, Keystore File (UTC / JSON) (which is selected with a blue dot), Mnemonic Phrase, Private Key, and Parity Phrase (noted as no longer supported). The second column, "Select Your Wallet File", contains a button labeled "SELECT WALLET FILE..." and a text input field with a password mask (dots). Below the button, it says "Your wallet is encrypted. Please enter the password." The third column, "Unlock your Wallet", features a large blue button labeled "Unlock".

Copy the **Contract Address** found on: <https://flyp.me>. Paste the address into the **To Address** field in MyEtherWallet.

Insert the **Amount To Send** field with the amount of *Ether* you wish to send. In the **Gas Limit** field, input **250,000**.

**Note:** The Gas Limit is important because the smart contract requires more gas than a normal transaction.

The Gas Fee slider is located in the header (the top right-hand corner) of the MyEtherWallet website. For the FYP Token Sale Period, the maximum Gas Fee you can use is 50 Gwei. Set the **Gas Fee** slider to your desired amount.

**Note:** You can only participate to the crowdsale from **September 28, 2017, 15:00 UTC** until **October 21, 2017, 15:00 UTC** or when the cap is reached.

Always check the URL and look for MYETHERWALLET LLC [US] Certificate up there. Look for <https://www.myetherwallet.com/>. Be safe & secure.

```

**Send Transaction**

**Warning!**

0xc33F11bB6fC72385d982c7E845D78eDB4d852C91 → 3 ETH → 0x06dafc2a5fe47fcc9f37b5f91c0c2bd1cf2a9a4c

You are about to send 3 ETH to address 0x06dafc2a5fe47fcc9f37b5f91c0c2bd1cf2a9a4c.

You are interacting with the ETH chain, provided by MyEtherWallet.

**Are you sure you want to do this?**

No, get me out of here! Yes, I am sure! Make transaction.

**Token Balances**

Ahhh! There are too many tokens for our poor nodes! Click "Load Token Balances" to see them all. You are limited to loading these once per minute. Try checking your balance on <https://etherscan.io> or [Etherscan.io](#) instead.

[Load Token Balances](#) [Show Tokens](#)

## Step Six: Confirming that the transaction was completed

At the bottom of the screen, a notification bar pops up. Click **View TX**. An Etherscan window showing your transaction will open. If there are no **errors** indicated in red, then your transaction was successfully.

**Note:** FYP shall be transferred to your address shortly after the transaction is confirmed.

## Where to go from here?

To add your FYP Tokens, please check information [here](#). During the Crowdsale, if you have questions, you can ask them on [Telegram](#) and [BitcoinTalk](#). Check out flyp.me on [Twitter](#) and [Steemit](#).

Thank you for participating!
